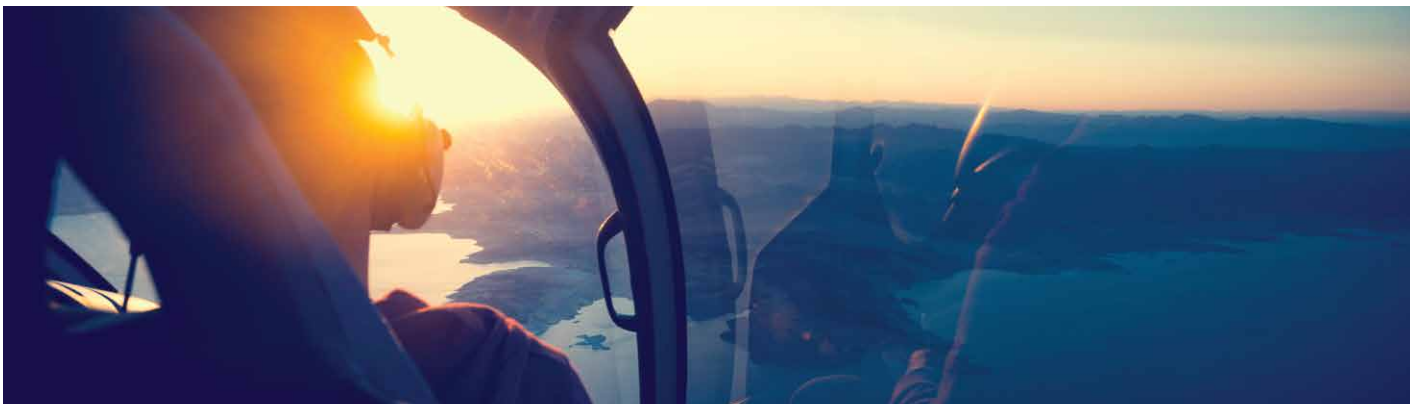
VERTIV.™

Liebert®

AC & DC POWER PRODUCTS TO MEET YOUR SPECIFIC INDUSTRIAL NEEDS

Enabling Tomorrow's

CRITICAL EDGE INFRASTRUCTURE



We helped some of the largest names in the industry bring new capacity online faster and at a lower cost when search and social media increased demand for storage and computing.

Protecting your critical technologies takes more than just great software and equipment. It takes a level of experience that only comes from years of finding solutions when the industry needed them most. We were the first to protect mainframes with precision cooling systems.

And now as challenges and demands grow, we continue to find better ways to help you strengthen your most vital applications. Formerly the Network Power business of Vertiv, we've brought together the most trusted and experienced names in critical infrastructure.

We were the first to introduce an integrated enclosure system to distributed networks.

Complemented by a network of nearly 250 service centers worldwide. It's a combination of experience and resources that allow us to better adapt to what's needed, anticipate what's next and continue to find solutions in ways other companies simply can't.

Our portfolio spans power, thermal and infrastructure management products, software and solutions.

Liebert® Hipulse D
Industrial AC UPS
5 – 160kVA

Feature-rich Industrial AC UPS system embedded with the latest technologies for optimal power protection and reliability

The Liebert® Hipulse D is an Industrial AC UPS system which is designed to meet a wide array of mission critical continuity needs in an industrial environment. It is embedded with the latest technologies available in the market today to provide your business maximum power protection even in the harshest conditions.

Features

- Fully digital UPS solution for industrial applications
- Robust design ensure high reliability features
- User-friendly display
- Design and temperature features for industrial
- Zero Transfer time
- Galvanic isolation features
- State of Art Mechanical Assembly design for ease of Maintenance
- Parallel redundant configuration
- Fully customizable
- External communication capabilities
- Customized Designs to suit IP protection requirements

Application

- Manufacturing : Pharmaceutical, Textile, Retail
- Power Generation
- T&D
- Oil and Gas
- Transportation
- Cement plants
- Steel Plants
- Chemical & Fertilizer

Liebert® Hipulse D
Industrial AC UPS
5 – 160kVA

A fully digital Industrial UPS system

- Easy System configuration through software for on-site modification and retrofitting needs
- State of the art SPWM Technology with digital control ensure low electrical noise for the loads/ appliances a fast transient response
- Better voltage regulation
- Low total harmonic distortion
- (THD) Easy navigation
- Event log for analysis of fault occurence and easier maintenance
- FP50Z-3X1- Input, Battery , Output, Bypass per Group 170, i.e. total 680 event logs; In Hipulse D-3X3 254 event logs
- Push button system control
- 2 lines of 20 characters display
- English & Chinese language display

Robust mechanical design for easy maintenance

- State of art front access for a more efficient maintenance
- If necessary, side and rear panels are removable Fan replacement from front or top
- Easy access to Thyristors, IGBTs, PCBs

Connectivity Options

- UPS MON-II (RS232 or ETHERNET based)
- SNMP (RJ45)
- MODBUS (RS 485)
- ETHERNET based remote monitoring (i-REMOTE)
- Profibus

International standards compliant

- IEC / EN 62040 – 1 : Safety
- IEC / EN 62040 – 2 : Electromagnetic compatibility
- IEC / EN 62040 – 3 : Performance & testing
- ISO 9001 : 2008 : Quality System

High reliability features

- 15 to 20 years product lifespan, supported by recommend preventive maintenance

Design & temperature

- Suitable for operation at higher ambient temperature
- Improved thermal design with ventilation ensures improve in MTBF of the components

Transfer time

- Safe transfer to bypass, without a break for the connected load
- 0 s when synchronized on reserve
- <10 ms transfer time in Async mode

Galvanic isolation features

- Any mains disturbance will not be transferred to the DC circuit or to the output
- Load remains safe all the time irrespective of switching/ transient in the Mains and sudden other output load changes in the O/P ACBD
- Double conversion topology provides clean and reliable power

Parallel redundant configuration

- Up to 3 units in parallel
- Immediate communication between the paralleled systems after connection
- No single point of failure
- Active load sharing

Customization Capability

- Customized UPS configurations offered at pre-sales stage
- Fully custom built options meet required output power, voltage levels as well as available input power and voltage quality levels
- Customer requirements like color, protection, PFC etc.
- Customized accessories like ACDB, SCVS, Cell Booster
- Option of input passive filter for PF & THDi improvement
- Battery charging requirements
- Extended temperature up to 50^{0}C
- Seismic qualification

Liebert® Hipulse D
Industrial AC UPS
5 – 160kVA

MODEL	Standard Offerings	Optional
INPUT		
Nominal Voltage	415 V AC, 3 Phase, 3 wire (+10 %, -20 %)	220 V AC 3 Phase, 3 wire (+ 10 % , -15 %)
Nominal Frequency	50 Hz (± 10 %)	60 Hz (± 6 %)
Input Power factor	>=0.88 up to 7.5 kVA and >=0.92 for 10 kVA and above	≥ 0.96
Input Fault Level	10 KA	50 kA (MCCB) Input Isolation Transformer (1)
RECTIFIER		
Type	Full Wave, Advance PFC Rectifier	12 Pulse, above 20 kVA Rating
CHARGER		
Type	IGBT based Dual mode of charging Suitable to charge VRLA-SMF, Lead Acid, Ni-Cd battery	
Nominal Voltage Regulation	± 1 %	
Ripple (without Battery) Charging Method	< 2 % Constant Voltage Constant Current (CVCC) Auto & Manual with 0 to 24 Hr programmable timer	
BATTERY		
Battery Voltage	240 VDC for 5 to 15 kVA (114 to 132 cells for Lead Acid & 181 to 210 cells for Ni-cd) 300 VDC for 20 kVA (144 to 162 cells for Lead Acid & 229 to 248 cells for Ni-cd) 360 VDC for 30-120 kVA (174 to 192 cells for Lead Acid & 277 to 305 cells for Ni-cd) Note : +2 Blocks of 12 V and -1 Block of 12 V possible	110 VDC (5-15 kVA UPS) (54 to 67 cells for Lead Acid & 86 to 96 cells for Ni-cd) 220 VDC (20-120 kVA UPS) (108 to 122 cells for Lead Acid & 172 to 191 cells for Ni-cd)
Type	Ni-Cd / Tubular / VRLA	
Battery Charging Capacity	5 to 10 kVA Up to 15 A — Up to 15 A 15 to 20 kVA Up to 20 A — Up to 20A 30 to 40 kVA Up to 30 A — Up to 30 A 50 & 80 kVA Up to 40 A — Up to 40 A 60 kVA Up to 55 A — Up to 55 A 100 to160 kVA — Up to 60 A	2 to 20 kVA — 40 A at 110 VDC 2 to 20 kVA — 20 A at 220 VDC 25 to 80 kVA — 60 A at 220 VDC As per Customer request (2)
Protection	Battery Breaker , Reverse Battery Indication	
OUTPUT		
Nominal Voltage Load PF Support Capacity	220V / 230V / 240V AC 1P & 400 / 415V AC 3P 0.6 to Unity (within its kVA / kW rating)	110 / 115 / 120 V AC 1P
Voltage Regulation	± 1 % for 230 VAC	± 2 % for 110 VAC
Frequency	50 Hz (± 0.1 Hz) in Free Running Mode	60 Hz (± 0.1 Hz)
Waveform	± 5 % (± 1 to 5 % adjustable) in Synchronous mode True Sine Wave	
Total Harmonic Distortion	< 2 % Max. for 100 % Linear Load	
Overload Capacity	< 5 % Max. for 100 % Non-Linear Load (IEC 62040–3) 110 % for 60 min, 125 % for 10 min. , 150 % for 1 min	
Duty	Continuous	
Inverter Philosophy	IGBT based PWM with INSTANTANEOUS sine wave control	
Dynamic Response	For 0 to 100 % step load change, the output shall remain within ± 5 % and recover to 98 % within 1 cycle (IEC 62040–3, Class 1)	
Crest Factor	3 : 1	

MODEL	Standard Offerings	Optional
STATIC SWITCH		
Frequency Synchronisation	± 2.5 Hz	
Slew Rate	0.2 Hz/Sec	
Transfer (Inverter to Bypass)	In Sync mode – No break in transfer In ASync mode – < 10 ms	
Re-transfer (Bypass to Inverter)	In Sync mode – No break in re-transfer In ASync mode – Not applicable	
Overload Capacity	1000 % for 100 ms	
Manual Bypass Operation	Make Before Break	
System Configuration	Standalone	Parallel Redundant with separate batt bank Hot Stand by
PHYSICAL		
Enclosure Protection	IP 41 - IP 42	
Colour	RAL 7035	RAL 7021 / RAL 7032 / IS 5 – 631/ RAL 9001 Structure or as per customer requirement
Paint Thickness & Type	90 micron (± 10 micron) Epoxy Powder Coated	
Cooling	Forced Air	
Cable Entry	Bottom	Top
Wound Components	Class of Insulation – Class H (Transformer / Inductor)	
GENERAL SPECIFICATIONS		
Operating Temperature	0 to 45 ^{0}C (5-20 kVA) 0 to 40 0C (30-120 kVA)	Up to 50 0C (2)
Relative Humidity	0 to 95 % (Non-condensing)	
Storage Temperature	0 to 60 ^{0}C	
Illumination Lamp Earth Busbar (Ref.IS 3043)	11 W CFL 5-20 kVA: 3 x 25 mm CU 3 x 25 mm CU 30-40 kVA: 3 x 25 mm CU 3 x 25 mm CU (Earth bus bar running along the panel) 50-120 kVA: 6 x 50 mm copper	Space Heaters
PFCs	(Earth bus bar running along the panel) One relay contact for each (Rating 250 VAC , 1 A)	PFC with 250 V , 2 A / 6 A rating
		Transducer 4 to 20 mA
Remote Panel		With LCD (Ethernet Connectivity)
UPS Monitoring Software		UPSMON II SNMP, MODBUS
Connectivity	RS 232 / RS 485	Ethernet / RS 485

Liebert® FP-60Z

AC UPS System

5 to 250 kVA - 1-phase or 3-phase output

APPLICATIONS

- Petrochemical and Chemical
- Water and Wastewater
- Continuous manufacturing processes

BENEFITS

- **Best-in-class performance to optimize expenses:**
- Reduced CAPEX - Upstream transformer, switchgear and cables are downsized thanks to high input power factor, low THDi rejection and low inrush current
- Controlled OPEX - Lower power consumption thanks to high efficiency
- Proven digital Vector Control technology to control the output waveform in real time, even on non linear loads
- **Industrial-grade maintain ability:**
- Innovative design without heavy power modules and allowing an easy front access to all components
- Removable ID Cards which safeguard the UPS parameters and facilitate control board replacement
- **Smart access to UPS data:**
- Large colour LCD touch-pad for user interface
- Embedded event logger (up to 2000 events) and capability to export recorded events via memory stick
- **Industrial flexibility:**
- Fit-for-purpose battery selection
- Galvanic isolation: either output or input and output transformers
- Wide range of electrical and mechanical options

Liebert® FP-60Z Uninterruptible Power Supply (UPS) is a true industrial UPS system offering a full-IGBT innovative design and embedding all the latest technologies.

The Liebert® FP-60Z is part of the FP range, which is designed to meet the most demanding schedules of industrial projects. Each FP product includes a wide choice of ratings and a selection of industrialized and pre-configured options to allow the product to be quickly configured and delivered.

Flexibility for a wide scope of industrial requirements

The Liebert® FP-60Z is available in standard range from 5 to 160 kVA in single-phase or three-phase output confi gurations and can be adapted to reach up to 250kVA output power. It offers a wide choice of DC battery voltages (110V, 220V or 400V) and of output voltages (from 1x110 V to 3x415V).

The UPS uses patented digital Vector Control technology which increases the UPS performances, enables active conditioning of the load and allows adaptability to different application needs. The Liebert® FP-60Z features a wide input voltage tolerance, which makes the system compatible with the harshest industrial power grids. To further improve load availability and process reliability, the Liebert® FP-60Z is able to operate in dual distributed parallel confi guration, with one or two reserve supplies, with single or dual batteries, and can include an AC bus-tie.

Key features

- Bi-directional rectifier to perform battery deep discharging tests into the mains
- Ingress Protection IP42 as standard for harsh environmental conditions
- Robust design to continuously operate at full load at 40°C

Liebert® FP-60Z

AC UPS System

5 to 250 kVA - 1-phase or 3-phase output

Ratings - Output Power at cos phi 0.8 (kVA) vs battery voltage (Vdc)

Technical Data

Input

Input voltage (other voltage on request)	3ph+N x 400 VAC (380; 415) ±10%
Inrush current	≤ In (without input transformer) ≤ 8 x In (with input transformer)
Power factor	up to 0.98
Frequency range	50 Hz (60 Hz factory setting) ±5%

Intermediate DC circuit

Nominal DC voltage	110 / 220 / 400 VDC
Voltage stability	±1% in float mode, input within tolerance
Voltage ripple (battery connected)	≤1% RMS, in fl oat mode
Current limitation	I nominal
Charging characteristic	IU according to DIN 41773

Output

Available ratings (see table above)	from 5 to 160 kVA (at PF 0.8 lagging)
AC voltage:	
• Single phase	230 VAC (220, 240) ; 110 VAC (115, 120)
• Three phase	400 VAC (380, 415) ; 220 VAC (190, 210)
Frequency	50 Hz (60 Hz factory setting)
Frequency stability:	
• with internal oscillator	±0.1%
• with reserve synchronism	±1% (from 1 to 4% factory setting)
Voltage stability (0-100% load variation):	
• static	±1%
• dynamic	VFI SS 111 - complies to IEC62040-3, class 1
Overload inverter (in % of nominal power)	150%/1 min - 125%/10 min
Short-circuit clearance:	
• 1-ph output (in % of nominal current)	250%/100 ms - 150%/5 s
• 3-ph output (in % of nominal current)	250%/100 ms - 150%/5 s
Voltage distorsion:	
with 100% linear load	<2 %
with 100% non linear load	≤5 % (complies with IEC 62040-3)
Allowable power factor	0.5 lagging to 0.5 leading
Allowable crest factor	3/1

Battery

Type	Lead Acid or Nickel Cadmium, vented or recombination		
Recommended number of cells:	110 Vdc	220 Vdc	400 Vdc
• Lead Acid	54 to 72	108 to 144	192 to 228
• Nickel Cadmium	88 to 98	176 to 200	320 to 323
Battery current limitation	0.1C (lead acid) / 0.2C (Nickel Cadmium)		

General Data

Efficiency	up to 92 % (in online mode and according to rating and confi g.)
Operating temperature	From 0 to 40 °C (without system derating)
Storage temperature	From -20 °C to +70 °C (battery excluded)
Relative humidity	<95 % non condensing at 20 °C
Operating altitude	1000 m (without system derating)
Cooling	Fan-assisted
External ingress Protection	IP 42
Noise	62 to 72 dB (according to rating)
Input / output isolation	2500 VAC / 1 minute
Frame colour	RAL 7035
Feet	100mm height
Gland plate thickness	3mm aluminium non-magnetic
Dimensions	Varying according to ratings and options from 1x800mm to 2x1000mm width

Standards

Compliance	IEC 62040 (-1, -2, -3) / 60146 / IEC 60950 IEC 60529 / IEC 60439 / IEC 60076 IEC 60332-1-2
Conformity	EMC Directive 2004/108/CE Low Voltage Directive (LVD) 2006/95/CE CE Mark

Options

Rectifier

- Input isolation transformer
- Special 3-ph input voltage (up to 3x690Vac)
- Lightning protections
- Input switch / input circuit breaker with aux. contact

Battery

- Internal battery protection (switch/circuit breaker)
- Battery circuit protection box (circuit breaker)
- Battery reversed polarity protection and indication
- Battery Low Voltage Disconnection (LVD)
- Battery black start
- Battery room temperature sensor for battery charge compensation
- DC earth fault detection
- Battery matching cabinet (for limited autonomies)

Output

- Output switch / circuit breaker with pos. contact

Reserve

- Reserve input switch / circuit breaker with aux. contact
- Reserve isolation transformer (H class)
- Reserve voltage stabilizer (servo-controlled)
- Stabilizer output isolator

System

- Parallel confi gurations (distributed parallel)
- Operating temperature up to 50°C with system derating
- AC distribution
- Backfeed protection tripping device
- Internal cabinet lighting
- Anti-condensation heater with thermostat
- Auxiliary power socket
- Redundant monitored fans
- Special cabinet identifi cation (Tag number, nameplate)

Mechanical

- Top cable entry
- Special frame color (RAL paint standards)
- Special feet height 200mm
- Special gland plate (2mm, 5mm thickness)
- Antivibration pads
- Lifting eyes
- G3 conformal coating on electronic cards against dust and humidity

Communication

- Additional volt-free contacts (up to 20 relays)
- Modbus RTU (RS232 or RS485)
- Modbus / TCP-IP
- Profi bus
- SNMP

APPLICATIONS

- **Industrial Process Automation in areas like**
  - Petrochemicals & Refineries
  - Oil & Gas Production
  - Power Generation & Utility Industries
  - Chemical And Pharmaceutical Industries
  - Primary Metal And Steel Industries
  - Pulp & Paper Industry
  - Other Process Industries Like Textile, Mining, Cement
  - Bio-Chemical Industries
  - Fertilizer Industry

Information Technology
- Data Centers, IDC, ITES, BPO
- Servers (LAN,WAN, MAN ERP, E-mail, Web and Others)
- Networking

Telecommunication
- Mobile (2G,2.5G,3G)
- Paging
- Fixed (Including WLL)

Transport Automation
- Airport Automation and Flight Booking
- Others Including Railways & Road Transport Automation
- Ticketing

Building Automation
- Access Control
- Security System
- Other Critical Application

UPS FOR THE DIGITAL WORLD, YOUR POWER QUALITY PARTNER

From reliability to availability, from scalability to redundancy, from user-friendliness to maintainability, from parallelibility to connectivity, from investment protection to lower cost of ownership, whichever value you need, Hipulse address them efficiently and effectively. Hipulse is carefully designed to maximize the “availability” of your critical loads to ensure that business is protected to the extent possible against power failure and / or power quality problems.

This is the Prime Objective for which the Hipulse is built. Beside this, Hipulse is designed to address many other “customer values”. More than ever before, this New Millennium would require your critical applications to these applications to be UP all the time. Any downtime of these applications will directly impact your business goals of revenue growth and your customer satisfaction.

Liebert® Hipulse
AC UPS System
20 TO 800 KVA

HIPULSE Out performs Conventional UPS Systems in Three Clear Ways

1. Proven Track Record
2. Availability and
3. State-of-art Technology

Hipulse has been designed to suit the Indian conditions after doing a “Power Mapping” Survey across India. It is timeproven system working across India for Various Critical applications. We do not experiment at your cost. Hipulse UPS System is aesthetically designed to match the décor of Industrial Control, Data Processing, Medical Diagnostics Equipment, Laboratory rooms with Elegantly powder-coated cabinet.

Salient Features

- Rated at 0.8 output power factor to deliver more real power
- On-Line Double Conversion
- IGBT based PWM Inverter
- Wide input voltage tolerance (+15 / -15%)
- Wide input frequency tolerance (+/-6%)
- Automatic battery testing
- High overload capability of static bypass (14 times for 10 milliseconds and 10 times for 100 milliseconds)
- Ingress protection IP 31/ IP32/ IP 41 /IP 42
- Capability to handle:
  - High crest factor loads / 100% non-linear loads
- Built-in maintenance bypass (Single and 1+N Models)
- Front access for spares replacement and preventive Maintenance
- Provision to use any type of battery: Wet cells (Tubular Plante), Valve Regulated Lead Acid (VRLA) / Maintenance Free and Nickel Cadmium.
- Adjustable frequency synchronization window up to +/- 9% in the static bypass
- Provision of automatic battery circuit breaker instead of using conventional isolator in the DC path
- Advance Battery Management
- Selectable Timer for boost charging duration of the battery. (15 steps with each step of 1 hour)
- Overload capability of the UPS:
  - 110% full-load for 60 minutes
  - 125% full-load for 10 minutes
  - 135%-150% full-load for 60 Sec
- Field Protocols ModBus
- Compact footprint
- Fan Redundancy
- Parallelbility: Up to 6 module can be parallel for capacity enhancement / redundancy.

Meeting Protection Needs

- Temperature-compensated battery charging (Optional)
- Common Battery Sharing / Battery Circuit Breaker
- Short-circuit proof inverter
- Input Harmonic Filter (HF)
- Protection against deep discharge of battery
- Auto online battery testing
- Battery Earth Fault Kit
- Back-feed Protection

Selectable Options

- Field settability of end-cell voltage of the battery
- Choice between Various Harmonic Filters
- 6 / 12 Pulse Rectifier
- Standard dry contacts
- Servo Controlled Voltage stabilize in bypass line (SCVS)
- Static Voltage Regulator (SVR)
- Load Bus Synchronization
- Input Isolation Transformer
  - Compatible with Liebert AF, the Active Harmonic Filter
  - Available for rectifier and / or bypass supply
- TVSS (Transient Voltage Surge Suppressor)
  - This offers protection from damaging transients and electrical line noises
- V-Connected Transformers.
- Fault Diagnostics Unit
- AC Distribution Board
- Liebert Static Transfer Switch
  - This allows critical load to be transferred between two independent, synchronised AC power sources without any risk of load disturbances
  - This allows automatic transfer of load between the two sources

Advanced Monitoring and Communications Capabilities Keep you in Control

Power Communication Options

When choosing the best system to protect your mission critical applications, an important consideration would be the software and communication options. As part of our commitment to provide the best solution for you, we offer a wide range of sophisticated software and communication options for Hipulse.

Communication Options

- **Fault Diagnostics Unit**
  - to meet the needs of Continuous Supervision of UPS Operation, Data Logging on a work station.
- **Relay Contact Card**
  - addresses the basic monitoring and communications needs of users/maintenance personnel.
- **Other Remote Communications**
  The Liebert Hipulse provides other communications alternatives through RS-232 & RS-485 ports.
- In addition to FDU, service personnel can also use the RS-232 port for local downloading of data, Building Management Systems Via ModBus Protocols while the RS-485 port can be utilized for a variety remote communications application.
- **OpenComms™ Web Card***
  - to meet the needs of network managers by providing interface to network management systems through SNMP/HTTP Protocols and Control through Building Management Systems Via Modbus and Jbus Protocols.
- **Local Communications**
  Liebert Hipulse provides excellent local communications through its LED-based mimic diagram and LCD panel. While the mimic shows the live power path, the back-lit contrast adjusting LCD provides you with detailed data on the unit and the system in twelve different languages through a user-friendly menu.

Liebert Power Monitoring Capabilities:

- MultiLink™ Automated System Shutdown Software
- Fault Diagnostics Unit.
- SiteScan™ Web Comprehensive
- Remote Alarm Monitoring Box

Comprehensive Display panel has three distinct functional sections to your Advantage

- **Mimic:** this section incorporates LEDs. Which indicate current operational status of the UPS System (i.e. the path of power flow) very clearly.
- **Controls:** Touch membrane switches on the front panel enable the inverter to be switched ON and OFF audible alarm RESET and allow all Output & Battery parameters to be selected for indication. In addition emergency STOP Button is provided as well.
- **Display:** 4 x 20 Line / 80 characters LCD Display indicates operating parameters and all alarm conditions automatically.

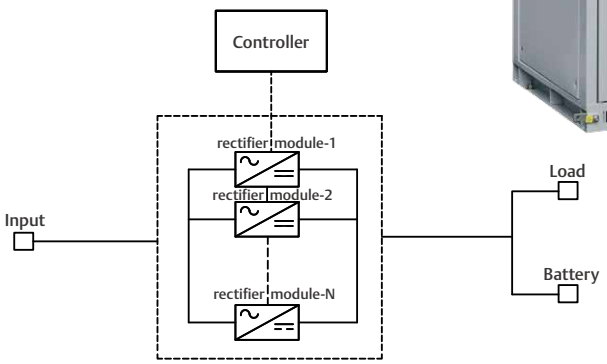
UtilitySure™ is a reliable industrial modular rectifier battery charger with stateof-the- art technology.

UtilitySure™ is designed to meet the most demanding specifications of industrial requirements. UtilitySure™ product includes a wide choice of ratings and operator friendly features.

Available in 24, 48, 110 & 220 nominal voltages.



BLOCK DIAGRAM OF A MODULAR DC UPS (FCBC)

Benefits

- **Highest availability of power:**
- Hot-swappable modules to reduce the MTTR (Mean Time to Repair).
- MTBF (Mean time between failures) > 2,50,000 hrs.
- Various redundancy levels - N+1 (or) N+2 (or) N+N to improve load continuity.
- **Monitoring:**
- State-of-the-art Individual DC feeder earth leakage monitoring.
- Battery Monitoring System (BMS).
- Each Feeder status monitoring (On/off/trip).
- **High electrical performances:**
- Wide input voltage tolerance to comply with the worst utility conditions.
- Near Unity input power factor, low THDi rejection and low in rush current to save installation and operation costs.
- High efficiency to lower power consumption.
- **Industrial flexibility:**
- Suitable for all battery types Lead Acid - VRLA/ Flooded or Nickel-Cadmium
- Scalability to meet the evolving load changes.

Key Features

- Large and colour LCD (touch-pad user interface - optional with EMU10 controller)
- USB port to import / export system configuration (optional with EMU10 controller)
- Low voltage ripple to optimize battery life
- In-built galvanic isolation (inside rectifier modules)
- Ingress protection up to IP 55
- Suits all weather conditions: works from - 40° C to 70° C

Applications

UtilitySure™ suits all DC UPS applications where modular design concept is key for maintenance with highest uptime. It is best suitable for all critical applications such as:

- Power generation
- Oil & gas
- Rail transportation infrastructures
- Power Transmission and Distribution substations
- Other industries

DETAILS OF RECTIFIER MODULES :

We have the following ratings of rectifier modules:

24V	48V	110V	220V
75A, 1Ph (ER2475S) /	30A, 1Ph (ER4830S)	10A, 1Ph (ER11010S)	5A, 1Ph (ER22005S)

STANDARD SPECIFICATIONS:

Following are the best specifications we can offer with 24V/48V/110V/220V DC UPS Systems :

AC INPUT	24 1/148V	1101/1220V
Nominal Voltage	**1 Phase :** 200 VAC to 250V AC(Rated),Maximum: 290V AC ; Minimum: 85V AC (85V AC to 180V AC output power limiting)	**1 Phase :** 200 VAC to 250V AC, (Rated) Maximum: 286V AC ; Minimum: 85V AC (85V AC to 180V AC output power limiting)
	3 Phase : By distributing the rectifier modules in each phase	**3 Phase :** 380VAC, 4W /3W (optional) Maximum: 530V AC ; Minimum: 260V AC (260V AC to 310V AC output power limiting)
Frequency	45Hz to 65Hz	45Hz to 65Hz
THDi	⩽5 % at rated load	⩽ 5 % at rated load
Power Factor	⩾ 0.99 at rated load	⩾ 0.99 at rated load
Slow Start Time	upto 8 seconds	upto 8 seconds

DC OUTPUT	24V	48V	110V	220V
Voltage	21 — 39V DC	42-68V	88-160V	176-320V
Current	20% - 110% rated current			
Efficiency	⩾ 90 %	⩾ 90.5 %	⩾ 92 %	⩾ 92.5 %
Ripple	⩽ 0.5 %	⩽ 0.1 %	⩽ 0.1 %	⩽ 0.1 %
Load regulation:	⩽ 0.7 %	⩽ 0.5 %	⩽ 0.5 %	⩽ 0.5 %
Voltage stabilizing accuracy:	⩽ 0.7 %	⩽ 0.5 %	⩽ 0.5 %	⩽0.5 %
Dynamic Response	200 micro sec			
Noise / Acoustics	⩽ 55 dB			
Features	a. Auto change over (from float to boost & boost to float)			
	b. Battery test facility to check condition of the battery			
	c. Hot swappable feature of modules			
	d. Modules are equipped inbuilt fans (ambient temperature & output current regulated)			

ENVIRONMENTAL	
Lowest start temperature	- 40°C
Highest work temperature	+ 70°C
Relative humidity	5% to 95%

GENERAL	
PROTECTIONS	Switches / Breakers at AC input, DC output & battery path Output short circuit
	AC input surge protection
	Output over voltage shutdown
	Output overload (current limit)
ALARMS & METERING	Details are on next page (details of options with different controller types)
Battery Compatible	VRLA / Tubular / Ni-Cd / Plante
Dimensions	As per rating & requirement
Paint Shade	RAL 7032 or RAL 7035 or as per requirement
Cooling of System	Natural or forced cooling for system (Rectifier modules are equipped with in-built fans)
Cable Entry	Bottom entry / Top entry
Cabinet Sizes	Width: 19" / 2 X 19" / 3 X 19" I Height: upto 2000 mm I Depth: 600 / 800 mm
Ingress Protection	Up to IP 55
Optional Features	Integral DCDB, BMS/BHMS, IMS & each feeder monitoring

Controller Options:

Various types of controllers are offered with 24V/48V systems. The details of these controllers are shown in table below:

	Controllers (24V or 48V)		
Controller name	M530S	ACU+	EMU1OLC
Display size	128 X 64 LCD	LCD with 4/16 characters	7" TFT HD LCD Touch Screen
Output voltage range	21 V-29V / 42-58V	21 V - 39V / 42V-58V	21 V - 39V / 42V-68V
Output current range	20% - 100% of rated current	20% - 100% of rated current	20% - 100% of rated current
Parameters monitored	Input Voltage Output Voltage Output Current Battery Voltage Battery Current Load Voltage Load Current	Input Voltage Output Voltage Output Current Battery Voltage Battery Current Load Voltage Load Current	Input Voltage Input Current Output Voltage Output Current Battery Voltage Battery Current Load Voltage Load Current

Feeder status monitoring (on/off/trip)	N/A	Available (optional)

Liebert® UtilitySure™

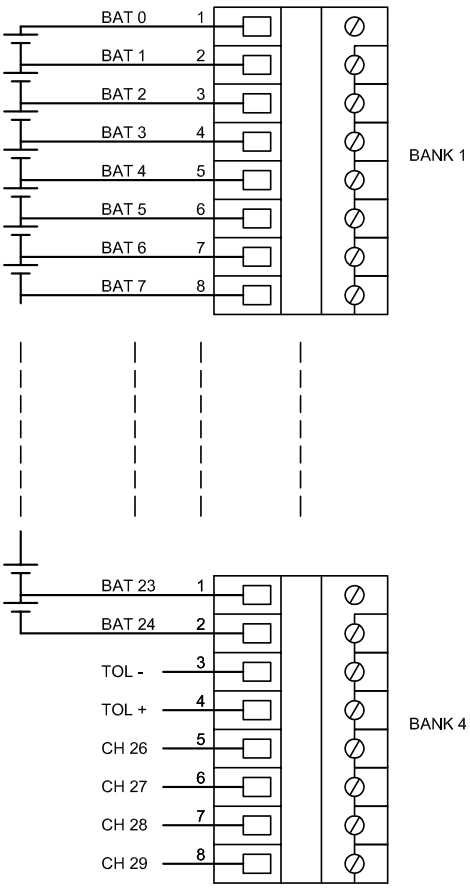
UtilitySure™ is a reliable industrial modular rectifier battery charger with state-of-the-art high frequency switching based switch-mode power supply. UtilitySure™ is specially designed to meet the most demanding industry specifications and includes a wide choice of ratings and operator friendly features.

SPECIAL FEATURES

1. BATTERY MONITORING SYSTEM (BHMS / BMS) :

An integral part of the charger, with the same controller,both charger and BMS can be monitored. Battery sensing modules (EBU-01) each having 24 voltage channels(0.1V-16.5V), 1 current channel and 2 temperature channels are based on number of cells that need to be monitored. For example, suppose there are 55 cells of VRLA with a 110V DC system; then 3 nos. of EBU-01 modules are required for battery monitoring. The maximum number of cells that can be monitored are 240 cells with EMU10 controller.

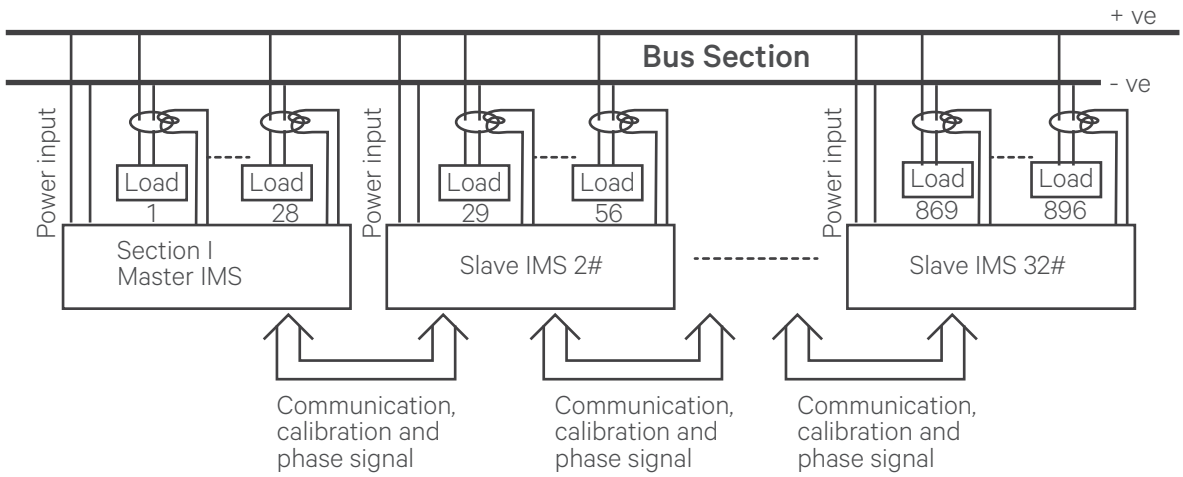
Suitable for 1.2 V /2V / 12 V battery monitoring.



2. INSULATION MONITORING SYSTEM (IMS) :

IMS is used to detect earth leakage in individual DC feeders. In any leakage develops between +ve/-ve DC line and earthing, then the fault is detected and immediately faulty feeder number and magnitude of leakage is displayed on the controller's display.

For this to be effective, a Hall effect CT has to be used in each feeder. These CT signals will be connected to the charger controller through EGU-01 sampling board. The connection drawing of IMS is as shown below: It can monitor upto 896 number of feeders insulation status.



3. FEEDER STATUS (ON/OFF/TRIP) MONITORING :

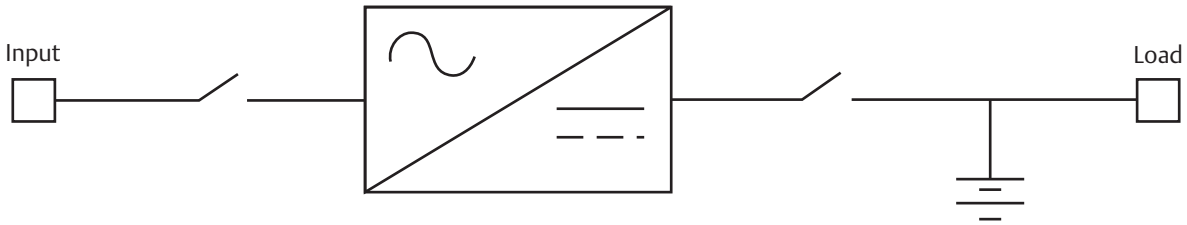
Tripping of DC feeders can be easily monitored by connecting each feeder (MCB/MCCB) trip contact to EGU-01 sampling module which will send signal to controller (EMU10). One EGU-01 can have 28 feeder inputs.

POSSIBLE CONFIGURATIONS:

1. FCBC

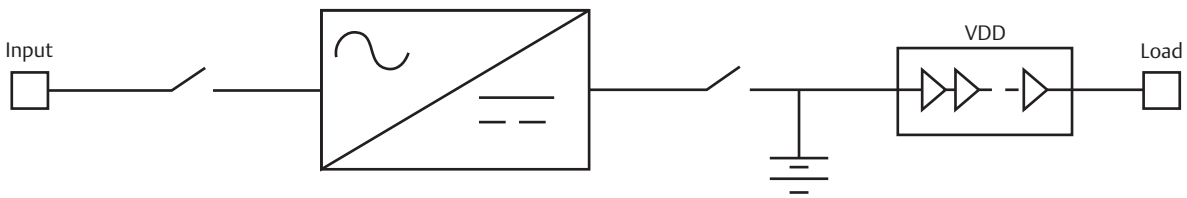
In this configuration, charger is connected directly to battery and load. Normally, the charger will be in float mode trickle charging the battery and supplying the load. When AC mains fail the battery will supply the load. On restoration of power, the charger will switch to boost mode, charging the battery and supplying the load. In the mode, boost voltage will be appeared across the load terminal.

There is also an option for integral DC distribution board.



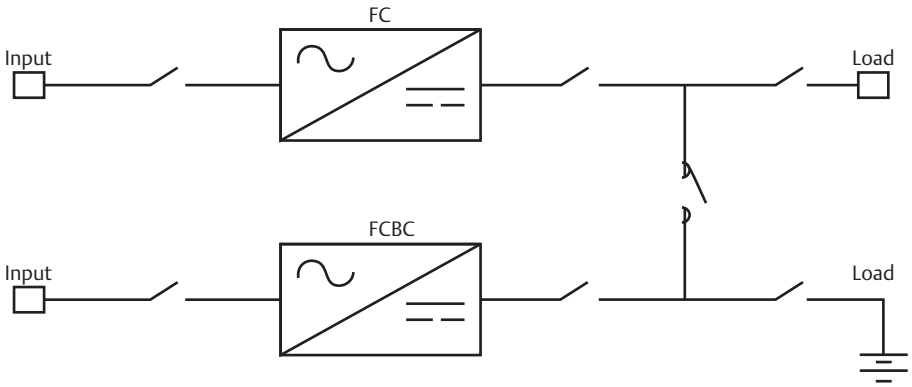
2. FCBC WITH VOLTAGE DROPPING DIODES

This configuration is very similar to the one described above. The extra feature is Dropper Diodes Chain which is required when there is only one FCBC and battery boost charging voltage is far high and if the voltage at load terminals needs to be limited within +/-10% of nominal system voltage. During float mode and AC mains fails condition the VDD shall be bypassed through DC contractor.



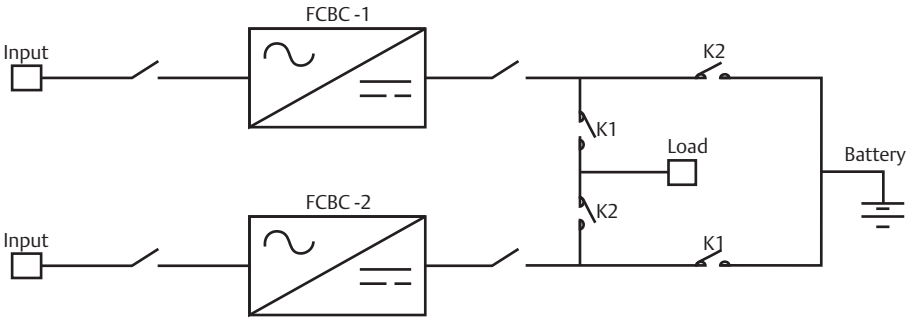
3. FC & FCBC

Here, one charger will always be in float mode(FC) and the other charger switches between float and boost modes based on battery condition (FCBC). When AC mains are ON, both chargers will be in float mode sharing the total load and trickle charging the battery. When AC mains fail, then contactor will be ON and load will be supplied by battery. Upon resumption of power, FCBC will switch to boost mode to boost charge the battery. Simultaneously, the contactor will be OFF. In this condition, both the charges will be working separately, FC supplying to load and FCBC boost charging the battery.



4. DUAL FCBC WITH 1X100% BATTERY, COMMON LOAD :

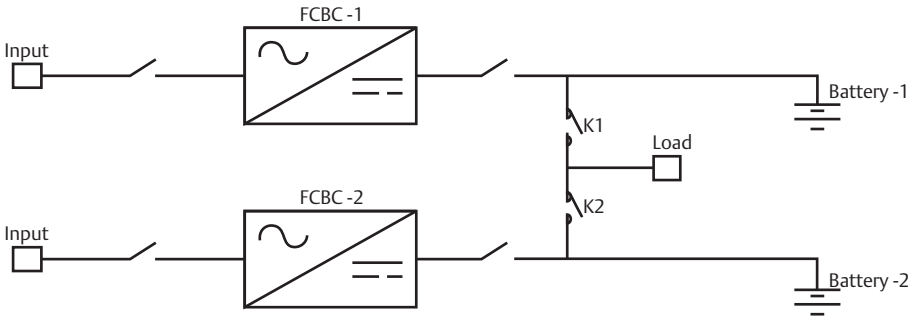
Both the chargers are Float cum Boost Chargers (FCBC). However, only one FCBC can go to boost mode at one time. Normally , both the charges will be in float mode sharing the total load and trickle charging the battery. When AC mains fail, both the contactors will be ON and load will be supplied by battery. Upon resumption of AC mains, one of the FCBCs will switch to boost mode and the respective contactor will be OFF(K1 for FCBC 1 and K2 for FCBC2), whilst the other FCBC will be in float mode supplying the load.



5. DUAL FCBC WITH 2X100% BATTERY, COMMON LOAD :

In this configuration, both the charges are float cum boost charges(FCBC) and the battery's configuration is 2x 100%. Each battery has 1 battery connected directly to it; however only 1 charger can go to boost mode at a time. If battery 1 needs boost charging, then FCBC-1 will go to boost mode to turbo charge the battery 1 and K1 will be OFF. At this time FCBC-2 will be float mode trickle charging the battery-2 and supplying the load.

If battery-2 needs boost charging, then FCBC-2 will go boost mode to boost charge the battery-2 and K2 will be OFF. At this time, FCBC-1 will be in float mode trickle charging the battery-1 and supplying the load.

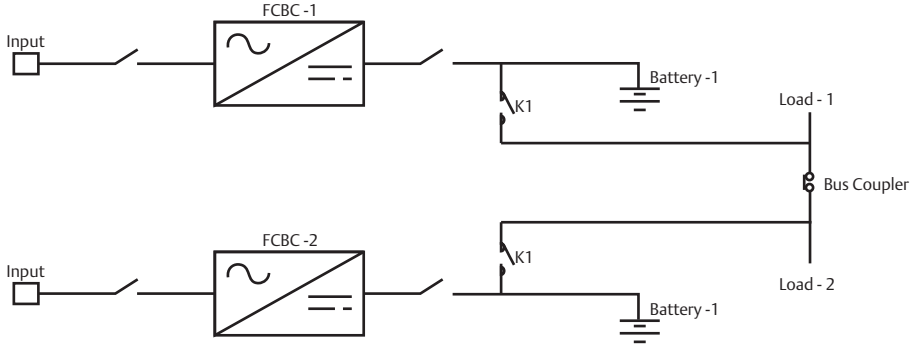


6. DUAL FCBC WITH 2X100% BATTERY, DUAL LOAD WITH BUS COPULER

Both the chargers have their respective batteries, but still only one charger can go to boost mode at a time. The bus coupler can be on auto/manual mode. (If required, we can give both chargers online boost charging as an option.)

If battery-1 needs boost charging, then FCBC-1 will go boost mode to turbo charge the battery-1 and K1 will be OFF.

If it is a manual system, then bus coupler has to be turned ON before any of the charges go to boost mode. If it is on auto mode, then bus coupler will become ON whenever the charges go to boost mode.



Liebert® RG
40 to 250 kVA UPS
Three Phase Input - Three Phase Output

Green Power Solution for Regenerative Load Applications

For the regulated power requirement, most of the CNC machines depend upon various power conditioners. However, these power conditioners are not sufficient to address the critical power requirement of CNC machine. The Four Quadrant Liebert RG UPS, offers regulated power, along with continuity and it also addresses the regenerative braking issues, thanks to its revolutionary design.

In the operation of CNC machine, whenever Regenerative braking occurs (faster deceleration of the motor speed or speed reversal) momentarily, the motor acts as a generator. This causes the current to flow in reverse direction, that is back to the
utility lines, through the power conditioner. For the conventional UPS, this regenerative power will increase its DC bus voltage which causes the UPS tripping due to DC over voltage condition. In some cases it might damage the DC capacitors. Liebert RG UPS allows this regenerative power to flow back, smoothly to the utility, without causing any interruptions or damages to the UPS as well as other connected load.

Liebert® RG UPS guarantees continuous, reliable and trouble free operation of CNC machine. Thereby decreasing the production losses, and increasing profitability!

FEATURES

- Double conversion online UPS
- Four Quardrant IGBT PWM rectifier
- Suitable for Regenerative Load
- Unity power factor
- Low input THDi
- State-of-the-Art Digital control
- Inbuilt isolation transformer
- Advance communication capabilities
- Compliance to International standards

Liebert® RG
20 to 250 kVA UPS
Three Phase Input - Three Phase Output

SPECIFICATIONS

Rating	**40, 60, 80, 120, 160, 200, 250 kVA**
INPUT	
Rectifier Design	Four Quardrant IGBT based PWM rectifier

Pulse Power Supply

Introduction

Pulse Power is the Science & technology of accumulating energy over a relatively long period of time & releasing it very quickly. For Plasma Processing DC Pulse Power Supply is required. DC Pulse Power Supply is very much in vogue these days when conventional techniques fail to produce acceptable results. Pulse is represented by a shift in Voltage or Current & thus Power.

Pulsing is done to

- Avoid arcing – or at least to reduce arc defects.
- Achieve better film properties : Denser , tougher , brighter , more Transparent.
- Achieve higher yields
- Increase throughput

Specially designed power supply for ;

- PACVD / PECVD (Plasma Assisted / Enhanced Chemical Vapor Deposition)
- Electro-deposition
- Nano-oxide reduction by hydrogen glow discharge
- High precision plasma metal removal from surfaces using reactive gases
- Hydrogen Production
- Anodizing

Features

- Option of voltage or current mode, as per the process requirement
- Smooth sputtering mode, +200 V to +1100 V pulse with variable duty and frequency
- Pulse frequency setting and variable voltage option
- Plasma current setting as per available working surface area

Pulse Power Supply

Rating	10 kVA	20 kVA	40 kVA	60 kVA
Input Voltage	415 V AC (+10% to - 10%), Three Phase & N			
Input Frequency	50 Hz (± 10%)

Liebert® Ipro LXi

AC UPS System

1 to 7.5kVA - 1 ph input 1 ph output

BENEFITS

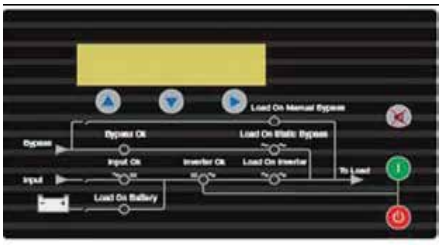
- **Improved reliability** with robust electrical performance
- **Smart Access to UPS Data:**
  - User Friendly LCD Display
  - Embeded Event logger (Total up to 800 Events)
- **Industrial Flexibility:**
  - Choice of Configurations & options (Refer Technical Data)
- **Compact foot print Area**
- **Easy On site maintenance**

KEY FEATURES

- **Ingress protection IP41** as standard for harsh environmental conditions.
- **Robust design** to continuously operate a full load up to 50 Deg C ambient temperature.
- Galvanic isolation between Input & output.
- Compatible with SMF/Lead Acid/Ni-cd battery.
- Digital control & monitoring
- Compact design with the capability to integrate Input isolation transformer up to 3 kVA in the cabinet (Optional)

The Liebert® Ipro LXi Uninterruptible Power Supply System (UPS) offers Single phase Input, Single phase Output design having IGBT based Inverter which works in hazardous industrial environment and capable of working with various batteries including Ni-Cd.

- Double Conversion On line UPS
- Superior Output Power Quality
- IGBT Based Inverter
- Advanced Battery management
- Network connectivity - Optional
- Industrialized options
- Compliance to International Standards
- Provides Parallel redundancy (2Units)
- In-built Isolation Transformer (Up to 3 kVA) - Optional
- Casters to Facilitate ease of movement & relocation



APPLICATIONS

The Ipro LXi is best designed for use in the following sectors : (But not limited to)

- Oil & gas
- Petrochemical & Chemical Industries
- Continuous process industries

Liebert® Ipro LXi
AC UPS System
1 to 7.5kVA - 1 ph input 1 ph output

VERTIV.

Ratings - Output Power at Cos phi 0.8 (kVA) Vs Battery Voltage (192 V dc)

Standards	
Compliance	IEC62040 (-1,-2,-3) / 60146 / IEC 60950 / IEC 60529 / IEC 60439 / IEC60332 -1-2 EMC Directive 2004 / 108 / CE Low Voltage directive (LVD) 2006 / 95 / CE

Technical Data	
Input	
Input Voltage	230V AC (+15 %, -10 %) Single phase
Power Factor	≥0.8(1)
Frequency Range	50 Hz (+/-6 %)
Charger	
Voltage Stability	+/- 1 % in float mode, input within tolerance
Voltage Ripple (w/o battery)	<=2 %
Charging Method	Constant voltage constant current
Output	
Available rating (See table above)	From 1 to 7.5 kVA (at PF 0.8 lagging)
AC Voltage :	
Single Phase	230 VAC (220, 240)
Frequency	50 Hz
Frequency Stability :	
- with internal oscillator	50 Hz (+/-0.25 Hz)
- with reserve synchronism	50 Hz (+/-2.5 Hz)
Voltage Stability (0-100 % load variation) :	
- Static	+/- 1 %
- Dynamic	Complies to IEC62040-3, Class 1
Overload Inverter (In % of nominal power)	150 % / 1 min - 125 % / 10 min
Voltage distortion :	
With 100 % linear load	< 3 %
With 100 % non linear load	< 7 %
Allowable Power factor	0.8 lag to unity (within its kVA / KW rating)
Allowable Crest factor	3 :1
Battery	
Battery Voltage	192 V DC
Type	VRLA / SMF / Ni-cd
Recommended number of :	
- VRLA	96 cells
- SMF	16 blocks of 12V
- Ni-cd	153 cells
Battery charging current limitation	Selectable & adjustable in step 2,4,6A
General Data	
Operating Temperature	Up to 50 Deg. C
Storage Temperature	0 to 70 Deg C (Battery Excluded)
Relative Humidity	Up to 95% RH, non condensing
Operating altitude	< 1000 m (Without system de rating)
Cooling	Forced air
External Ingress Protection	IP41
Input / Output Isolation	2 KV AC for 1 min.
Frame Colour	RAL 7035
Dimensions	Varying according to rating & options (Consult us)

Options	
Input	60 Hz (+/-10 %) Input Isolation Transformer
Battery	Charging Current - Selectable & Adjustable in step 5,10,14 A. Battery Reverse Polarity Protection, indication on LCD & alarm Common Battery Bank
Output	Configuration - Parallel Redundant - 2 nos . / Hot stand by / Load Bus sync Voltage - 110 V AC (+/-2 %) Frequency - 60 Hz (+/-0.25 Hz) (Factory setting)
Bypass (Reserve)	Isolation transformer Cubicle (Separate Cabinet) SCVS + Isolation transformer Cubicle (Separate Cabinet) SVR (Separate Cabinet)
System	AC Distribution (Separate cabinet) G3 conformal coating on PCBs
Mechanical	Frame Colour - RAL 7032 / RAL 7035 IP42
Communication	Potential free contacts - Rectifier Trip, Inverter trip , Load on battery, Battery low pre alarm, Load on static bypass (1 relay contact for each, Rating 1A / 230V or 2A / 12 V DC) UPSMON II - Ethernet based SNMP - Ethernet based Combination - UPSMON II (232) + Modbus (485) or UPSMON II (Ethernet) + SNMP (RJ45) + Modbus (485) Profibus (Separate) I Remote - Ethernet based (Separate)

(1) At nominal Input Voltage & rated Load
(2) For Common battery bank Input isolation transformer is mandatory.
